- 5. [Appendix B – Asset Universe](#)
- 6. [Appendix C – Strategy Definitions](#)

## Executive Summary

This report evaluates multiple AI, Crypto, and blended strategies vs benchmark (VOO). Results show trade-offs between **upside potential** and **downside risk**, comparing **Fixed vs Rebalanced**.

	Median	5th % (Downside)	95th % (Upside)
100% BTC (Fixed)	\$261,262,106	\$3,967,507	\$19,105,451,181
100% BTC (Rebalanced)	\$244,830,101	\$3,535,465	\$18,330,334,492
60% Crypto / 40% AI (Rebalanced)	\$113,392,719	\$6,912,106	\$1,581,580,711
60% Crypto / 40% AI (Fixed)	\$110,099,410	\$7,455,813	\$1,602,716,137

	Median	5th % (Downside)	95th % (Upside)
<b>Crypto Blend (Fixed)</b>	\$99,316,432	\$1,136,793	\$6,746,325,391
<b>Crypto Blend (Rebalanced)</b>	\$95,887,900	\$1,175,655	\$6,250,729,964
<b>70% AI / 30% Crypto (Rebalanced)</b>	\$51,891,749	\$7,880,336	\$318,239,333
<b>70% AI / 30% Crypto (Fixed)</b>	\$51,652,492	\$8,950,839	\$323,822,966
<b>AI Blend (Rebalanced)</b>	\$12,290,605	\$1,945,124	\$71,415,653
<b>AI Blend (Fixed)</b>	\$12,239,301	\$1,902,275	\$70,825,068
<b>CFO Policy (Target 8%)</b>	\$3,221,261	\$404,574	\$34,210,996
<b>40% AI / 60% VOO (Fixed)</b>	\$2,284,920	\$841,283	\$5,948,182
<b>40% AI / 60% VOO (Rebalanced)</b>	\$2,279,535	\$845,667	\$5,901,946
<b>100% XRP (Fixed)</b>	\$2,200,862	\$7,103	\$687,265,449
<b>100% XRP (Rebalanced)</b>	\$2,199,096	\$7,626	\$624,302,034
<b>100% VOO (Fixed)</b>	\$549,976	\$186,442	\$1,650,020
<b>100% VOO (Rebalanced)</b>	\$543,135	\$184,297	\$1,626,386

# Distribution of Outcomes

Note: Logarithmic scale highlights both downside losses and extreme upside tail.

## Conclusions & Recommendations

Comparing **Fixed vs Rebalanced** strategies highlights clear trade-offs:

- **Aggressive Growth:** 100% BTC or Crypto Blends maximize upside but carry extreme downside volatility.
- **Balanced Innovation:** Rebalanced mixes (e.g. 60% Crypto / 40% AI or 70% AI / 30% Crypto) provide strong upside with better downside control.
- **Risk-Managed:** The CFO Policy and AI Blend (Rebalanced) offer smoother compounding while limiting tail risk.
- **Conservative:** Benchmark-heavy allocations (VOO, SPY, ^GSPC) minimize downside but deliver the lowest long-term growth.

Executives should align allocation choice with **risk tolerance** and **strategic objectives**. A diversified *Rebalanced mix* (AI + Crypto) is recommended for most forward-looking innovation portfolios.

# Appendix A – Methodology

This report simulates **20-year** investment outcomes using a bootstrap Monte Carlo approach based on **daily historical returns** from 2015-01-01 to 2025-01-01. Both **Fixed** and **Rebalanced** strategies are compared:

- **Fixed Weights:** Allocations remain constant after initial investment, allowing drift.
- **Rebalanced Weights:** Allocations reset annually to target percentages, controlling drift and volatility.

**CFO Policy:** Conditional allocation to BTC/AI if benchmark return exceeds 8% annually.

**Data Source:** [Yahoo Finance](#) via *yfinance*.

**Disclaimer:** This report is for educational and demonstration purposes only. It does not constitute financial advice. Past performance is not indicative of future results.

# Appendix B – Asset Universe

Ticker	Name / Description	Category
BTC-USD	Bitcoin	Cryptocurrency
XRP-USD	Ripple (XRP)	Cryptocurrency
NVDA	NVIDIA – AI & Semiconductors	Equity
MSFT	Microsoft – Cloud & AI	Equity
GOOGL	Alphabet (Google) – AI & Search	Equity
AAPL	Apple – Consumer Tech	Equity
TSLA	Tesla – EV & AI/Autonomous Driving	Equity
VOO	Vanguard S&P 500 ETF	Benchmark
SPY	SPDR S&P 500 ETF	Benchmark
^GSPC	S&P 500 Index	Benchmark

## Appendix C – Strategy Definitions

- **100% BTC:** Entire portfolio in Bitcoin.
- **100% XRP:** Entire portfolio in Ripple (XRP).
- **AI Blend:** Equal-weighted NVDA, MSFT, GOOGL, AAPL, TSLA.
- **Crypto Blend:** Equal-weighted BTC and XRP.
- **60% Crypto / 40% AI:** Split allocation.
- **40% AI / 60% Benchmark:** Balanced allocation with benchmark.
- **70% AI / 30% Crypto:** Heavier tilt to AI equities.
- **CFO Policy (Target 8%):** Allocate to BTC/AI only if benchmark > 8% annual return.
